BUMPER[®]

MANUFACTURER OF HI-FI SPEAKERS
MADE IN U.S.A. www.bumperspeakers.com

BUMPER

Industries, Inc. a leading manufacturer of hi-fi speakers has over 17 years of experience in the electronic industry.

BUMPER speakers are designed and manufactured in the U.S.A. with the highest quality parts under professional supervision and quality control. To ensure their highest quality and performance, 100% of BUMPER speakers are inspected at the time of production. We have proven our commitment to our customers by continually upgrading our quality and cost on existing products and simultaneously developing new products to meet their changing needs by focusing on highly efficient, technologically advanced, centralized production and researched facilities.

BUMPER Speakers are Simply the Best! They are known world wide for their uncompromising applications, performance and untouchable values, which are tuned for today's music in the ever-changing world, where there are no boundaries. BUMPER Speakers have been driven to provide what we believe to be the best balance in performance, style, quality, and value, that definitely compliments and enrich everyone's lifestyle. We at BUMPER Industries, Inc. can confidently say that BUMPER will continue to strive to lead the way in the new millennium.

To determine our marketing strategy we get our inputs regarding the market and it's changing demand through our global distribution network who are in direct contact with the consumers. We believe BUMPER will continue to maintain its bright future in all areas. This success is owed to a team of dedicated professionals who continue to assist us in all aspects.

In a market place that appears to be bursting at the seams with just about every brand loudspeaker manufactured in the world, it certainly is satisfying to see that BUMPER speakers are competing favorably with so many internationally known names; especially in the Car Audio Contest that gives us the opportunity to compete in a Professional level proving our superiority.

At Bumper Industries, Inc. the most meaningful asset is our reputation and to that end we've made a commitment.

MOBILE AUDIO

Our newly developed FR Series are made with heavy duty aluminum cast frames, 3" pole piece with 1 1/2" Diameter center hole, triple layer foam surround attached to a paper cone body, flat 7" spider, dual caps, and gold plated terminals. This series is designed with massive double magnet structure to handle an extensive level of power.

CARS MOBILE AUTOMOBILE

MADE IN U.S.A

All DV (Double Voice Coil) models are available in 2+2, 4+4, 6+6 Ohms, and also in single coil. For specification and data. Please refer to the attached information sheet.

This series is made with 1" diameter heavy duty santoprene surround in 30 and 40 mil thick texture polypropylene cone coupled 7.00" poly cotton spiders in DC models provide the precise coil alignment and critical cone motion control. Their vented back plate/pole piece and 0.400" top plate magnetic structure enables them to maximize the magnetic efficiency and energy. This design creates a superior magnetic field, which insures maximum heat dissipation and long coil life. The Bumper's heavy-duty aluminum cast frames are all specially reinforced inside to eliminate any vibration, which would otherwise cause distortion in heavy bass notes.

IP SERIES DC18180 IP

IP SERIES DC18115 IP

Our IP series with its poly cone body/foam surround as well as the heavy front plate, vented back plate/pole piece, and poly cotton spider offers a great sound.

This series is made with 1" diameter heavy duty black foam surround in 30 and 40 mil thick polypropylene cone coupled with poly/cotton spider in both 5" Cup and Flat 6" & 7" provide the precise coil alignment and critical cone motion control. They are made with one-piece vented back plate/pole piece and 0.400" top plate magnetic structure to maximize magnetic efficiency and energy. This design creates superior magnetic field, which insures maximum heat dissipation and long coil life. The speaker terminals are all soldered by highly trained personnel's using high solid soldering wires to avoid any possible sparks or cutoffs in high power systems.

For specification and data. Please refer to the attached information sheet.

MX
SERIES

The new MX series is designed with 1" Diameter heavy black foam surround and laminated cone body. The Vented back plate/pole piece and 0.400" top plate is added to maximize the magnetic efficiency and energy. This series is designed to be user friendly and works well in both sealed and ported enclosures.

The X series is loaded with our new treated pulp cones, heavy-duty double black thickness foam surround and poly cotton spider allowing us to provide the precise coil alignment and critical cone motion control. The X series are made with one-piece vented back plate/pole piece, 0.400" top plate magnetic structure, 1" long winding, and high performance kapton/copper voice coils in 4 and 8 ohms impedance.

Bumper's classic RF series are still popular and highly in demand after being in production for over a decade. Over the years the series have been modified to insure premium performance as expected from Bumper Speakers. The RF series are loaded with the New Year 2000 treated pulp cones and heavy-duty double red over black foam. They are all coupled with poly/cotton spider to provide the precise coil alignment and critical cone motion control. Like all other Bumper series they are made with one piece vented back plate/pole piece and 0.400" top plate magnetic structure to maximize magnetic efficiency, energy, heat dissipation and coil life.
